Xth World Congress on Conductive Education

Dear Dr. Zsebe, dear Dr. Szabó, dear Organisers of the WCCE,

We were hugely impressed by the organisation of the Xth World Congress on Conductive Education which was a great success! We received lots of positive feedback from colleagues and professionals here in Germany and are delighted to pass this feedback on to you and all organisers.

The current situation in connection with the epidemic is very difficult and we were very grateful for the courage of the Semmelweis University, Pető Faculty to admit to this digital format, in particular with such an enormous amount of audience and speakers. This truly special congress is an immense achievement and will not only mark a jubilee milestone for conductive education but always be remembered due to this online format in 2020! For us it shows that conductive education will find its way no matter what, against all odds.

We are grateful that all new findings, developments and practice could be shared and delivered to all interested parties. It is great that due to the free connection an even wider range of people were able to tune in. Thanks again for making it work in difficult times!

With kind regards,

Marita Holper

President and the entire BKF Board
